CONTENTS

1	Introduction	1
2	Software applications	3
2.1	Veronte Link	3
2.2	CAN Isolator PDI Builder	3

INTRODUCTION

First of all, Veronte Link is required to connect a **SCI** to a computer. Then, it can be configured with **CAN Isolator PDI Builder**.

Warning: Select your version before reading any user manual for software. The following image shows where to select a version from any Embention user manual.

SOFTWARE APPLICATIONS

2.1 Veronte Link

Veronte Link establishes communication between a computer and any Veronte product by creating a VCP bridge. It allows to use multiple control stations and devices to be interconnected, operating simultaneously. **Veronte Link** also includes a post-flight viewer, to reproduce all recorded data from previous flights and generate plots and reports.

Read the [user manual for Veronte Link](#) for more information.

2.2 CAN Isolator PDI Builder

CAN Isolator PDI Builder is the main configuration tool to adapt a **SCI** to a specific vehicle, including user-defined communication protocols.

Read the [user manual for CAN Isolator PDI Builder](#) for more details.
